Sinological extension

Sinologists working on Chinese and other Sino-Tibetan languages often use some characters originally adapted by Karlgren from the Swedish Landsmålsalfabetet for the representation of apical vowels. 027F and 0285 are derived from straight and tailed versions of the italic (dotless) long i in that notation, but over time took on their own identity. The character names are misleading.

Sinological extension

The tail on this character ultimately derived from the hooked terminal stroke of an italic (dotless) long i, but its use for an apical retroflex vowel has led to reanalysis as a retroflex hook.

Long arrows

The long arrows are used for mapping whereas the short forms would be used in limits. They are also needed for MathML to complete mapping to the AMSA sets. Long arrows for chemical reactions constitute a set as follows: 27F5-27F7, 1F8D0-1F8D8.

- 27F5  LONG LEFTWARDS ARROW
→ 2190  leftwards arrow
- 27F6  LONG RIGHTWARDS ARROW
